

## Why an Eye Exam?

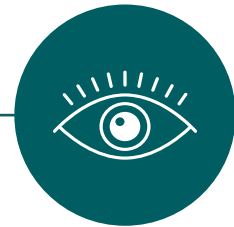

Taking care of your eyes doesn't only mean having better vision. During an annual eye exam, the provider may identify vision correction needs in addition to emerging health issues during your annual eye exam.

Eye exams may detect conditions (like diabetes) early, thus potentially preventing unnecessary medical costs.

An eye exam takes less than an hour and consists of safe and simple visual acuity tests.

Unidentified vision problems may cause headaches, dizziness, and can hinder learning in the classroom.

### What's Next?

Schedule your annual eye exam – it's easy!

1. Visit [davisvision.com](https://davisvision.com) or [superiorvision.com](https://superiorvision.com) to find an in-network provider near you.
2. Contact the provider to schedule an appointment.
3. Go get your eye exam!
